February 23, 2023

**BULLETIN NO. 1149**

**ELECTRONIC MAIP STAMP**

CAR is pleased to announce the implementation of an electronic stamp (E-Stamp) for use on registration and insurance certifications for MAIP policies. A tutorial and instructions for the use of an E-Stamp, by certified MAIP users, are available in the MAIP section of CAR's website (valid user-id and password required). It is CAR's intent to implement use of the E-Stamp for all agencies as of March 1, 2023. The availability and use of an E-Stamp will be complementary to the availability and use of wet stamps. There are currently no immediate plans to eliminate wet stamps or the procedures involving the replacement of wet stamps until such time as the usage of each can be further evaluated.

As a result of this implementation, amendments to the Assigned Risk Producer Procedures Manual were made in Chapter II – MAIP Stamp Requirements and Authorization and Chapter IV – MAIP Stamps to reference the availability and use of E-Stamps.

Questions regarding usage of the MAIP E-Stamp can be directed to CAR's Residual Market Department or by emailing [maipsupport@commauto.com](mailto:maipsupport@commauto.com).

JOHN METCALFE  
Director – Residual Market Services
