

# ***Performance Standards for the Handling and Payment of Commercial Claims by Servicing Carriers***

## **Introduction**

G.L.c.175, §113H requires Commonwealth Automobile Reinsurers (CAR) to establish Performance Standards for Servicing Carriers designed to contain costs, ensure prompt customer service, monitor the payment of legitimate claims, and to resist inflated, fraudulent, and unwarranted claims. G.L.c.175, §113H further provides that the Performance Standards be reviewed two years after such Standards are approved.

The Performance Standards were last approved by the Commissioner of Insurance in her Decision of September 6, 2011 to apply to the Commercial Servicing Carrier Program.

The Performance Standards developed by CAR, require Servicing Carriers to establish and maintain plans and programs to comply with the Standards. In some situations, time frames have been established to ensure prompt customer service.

Measurements of performance and compliance with the Standards are conducted through examinations of claims enhanced by relevant Statistical Plan data and procedures established by CAR. The procedures used to conduct these examinations will follow those outlined in the NAIC Market Conduct Examiners Handbook Chapter VIII G. Claims. Further details are contained in Appendix J CAR Claim Department File Review Process Section 2. Commercial Policies, and the Manual of Administrative Procedures (MAP).

Statistical Plan data including the Average Cost per Claim and Allocated Expense Report is used to supplement the information obtained in the claims file review to evaluate carriers' performance. Servicing Carriers are also required to report savings brought about by SIU activities for physical damage, bodily injury, and personal injury protection claims.

The Performance Standards require and are in addition to compliance with Massachusetts laws and regulations regarding automobile insurance and the CAR Rules of Operation. When revisions to existing laws or regulations or any new laws or regulations relating to claims handling are promulgated, they will become part of the Performance Standards.

The following Appendices are included to assist Servicing Carriers in implementing the Performance Standards:

## Measurements & Penalties

### Measurements

G.L.c.175 §113H requires that CAR propose rules to govern the application of penalties for, among other things, the failure to meet the Performance Standards for the Handling and Payment of Claims by Servicing Carriers.

The following Performance Standards, approved by the Commissioner of Insurance apply to the Commercial Servicing Carrier Program.

Measurements of performance and compliance with the Standards are conducted through examinations of claims enhanced by relevant Statistical Plan data and procedures established by CAR. The completion of a questionnaire by the Servicing Carriers prior to the biennial review provides background information on the claim handling programs established by the carrier to comply with the Standards. This will be supplemented at the time of the examination by a review of company internal documentation including but not limited to claim manuals, reserving and claim settlement procedures, and internal audits. In addition to Statistical Plan data, Servicing Carriers are required to report savings brought about by SIU activities for physical damage, bodily injury, and personal injury protection claims.

Servicing Carriers are evaluated on the effectiveness of their claim handling in meeting industry best practices as well as for their compliance with the Performance Standards and the NAIC Standards. Carriers are measured against the benchmarks listed and industry averages as well as their own prior performance. Both quantitative and qualitative aspects of the claims process are evaluated. The most readily quantifiable standards are the ones that involve specific time frames, averages, and counts. Other standards are qualitative such as reserving, medical management, evaluation, and settlement. The benchmark for compliance with the best practices and standards is 80%. The measurements for glass, reinspections, and ICPIP are set at MA statutory levels.

If it is determined that a Servicing Carrier is not in compliance on ceded files with the Performance Standards the CAR Claim Department will then determine the degree to which the non-compliance exists in the following areas addressed by the Standards. Specifically, the areas are:

- I. Auto Physical Damage & Property Damage Liability Claims
- II. Bodily Injury & Uninsured/Underinsured Motorist
- III. No Fault Personal Injury Protection Benefits
- V. Expenses

For Section IV. Voluntary/Ceded Claim Handling Differential, CAR will evaluate and compare the individual company performance on the handling of ceded and voluntary claims. Statistical testing will be performed to determine if there is any statistically significant difference in the handling of voluntary and ceded claims by the Servicing Carrier. If CAR determines that the company is in non-compliance with the Voluntary/Ceded Claims Handling Differential Standard a penalty will be assessed.

Minor non-compliance indicates that a carrier is not in compliance with the Standards in one or more areas but the quality of claim handling is unaffected and no overpayments result from this situation.

## Commercial Claims Performance Standards

Major non-compliance indicates that a carrier has failed the Standards in one or more area. Claim handling is affected and overpayments may be occurring as a result. The carrier will be notified of the extent and areas in which non-compliance exists and will be warned that the subsequent review of the carrier must reflect compliance in all of the cited areas to avoid penalty.

If in the review subsequent to being warned of major non-compliance a carrier remains in non-compliance but has improved its claim handling practices significantly, a Type I penalty will be assessed for the area in which this non-compliance exists.

If in the review subsequent to being warned of major non-compliance a carrier fails to improve its claim handling practices, a Type II penalty will be assessed for the area in which this non-compliance exists.

One penalty will be assessed in each of the following sections of the Standards in which major non-compliance is found:

- I. Auto Physical Damage & Property Damage Liability Claims
- II. Bodily Injury & Uninsured/Underinsured Motorist
- III. No Fault Personal Injury Protection Benefits
- IV. Voluntary/Ceded Claim Handling Differential
- V. Expenses

The amount of the penalty will be determined by the type of penalty using the following Schedule of Penalties.

In the event that non-compliance continues beyond two years, the penalties will increase for the third year according to the Schedule of Penalties. In the fourth year of non compliance the Carrier would be referred to the Governing Committee for possible termination.

Should a carrier achieve compliance after being penalized for non-compliance with the Standards, it must maintain compliance for two years before it is returned to pre-warning status.

Should a carrier disagree with the findings of the CAR Compliance Audit Department, it will notify the Vice President of Compliance Audit and a meeting will be held to discuss the findings. If agreement cannot be reached, the carrier may appeal the decision to the Governing Committee in accordance with Rule 20.

Schedule of Penalties			
Type I Penalty by Year			
1st Year	2nd Year	3rd Year	4th Year
Warning	\$6,000	\$30,000	Governing Committee
Type II Penalty by Year			
1st Year	2nd Year	3rd Year	4th Year
Warning	\$20,000	\$100,000	Governing Committee

## Commercial Claims Performance Standards

The compliance status of the Commercial Servicing Carriers will be reported to the Compliance Audit Committee, Governing Committee, and the Division of Insurance.

The following benchmarks and measurements are utilized to compare the Servicing Carrier's performance to the Industry on commercial claims handling. Except where noted, the benchmarks for compliance is 80%.

Best Practices	NAIC Standard	Measurement	Benchmark
